Summary

Passionate Full Stack Developer with experience building responsive, user-friendly web applications using React, Node.js, and MySQL. Strong foundation in front-end and backend development gained through rigorous learning and real projects, including clones of popular platforms such as Apple, Netflix, and Amazon. Demonstrated ability to balance a full-time banking career with continuous tech learning and project delivery. Committed to growth and contributing to impactful technology solutions.

Technical Skills

- **Languages:** HTML, CSS, JavaScript (ES6+), SQL
- **Frontend:** React, Bootstrap, Vite, Responsive Design
- **Backend:** Node.js, Express.js, MySQL
- **Tools & Platforms:** Git, GitHub, Vercel, Netlify, EmailJS
- **Other:** REST APIs, Firebase Authentication, TMDB API

Experience

Bank Officer

Dashen Bank, Addis Ababa — 2021 – Present

- Over 3 years of experience in financial services at one of Ethiopia's leading banks.
- Developed strong communication, accuracy, and time management skills.
- Balancing full-time work with continuous learning and building projects in web development.

Freelance Web Developer

2025

- Customized a pre-built website template for Bright Sprouts Learning (a daycare center in the USA).
- Modified layout, content, and styles using HTML, CSS, and JavaScript to meet the client's needs.
- Integrated EmailJS for the contact form and deployed the site on Hostinger.
- This project marked the start of my freelance journey.

Projects

Apple Website Clone

- A pixel-perfect front-end clone of Apple's homepage built with React and CSS.
- Practiced reusable components, responsive design, and deployed on Vercel.
- Live Demo: <https://apple-clone-beta-two.vercel.app>
- GitHub: https://github.com/Fuad-Delil/Apple_Clone

Netflix Clone

- Front-end clone built with React, Vite, and CSS. Utilizes The Movie Database API to fetch and display trending movies.
- Fully responsive and hosted on Netlify.
- Live Demo: <https://cloneof-net-flix-fuad.netlify.app>
- GitHub: <https://github.com/Fuad-Delil/Netflix-Clone-2025>

Amazon Clone

- React-based eCommerce UI with Firebase Authentication and Firestore for storing orders.
- Designed to mimic core Amazon features with a clean, user-friendly interface.
- Live Demo: <https://amazon-clone-fuad.netlify.app/>
- GitHub: <https://github.com/Fuad-Delil/Amazon-Clone-2025>

Evangadi Forum

- Full-stack discussion forum built with Node.js, Express, and MySQL.
- Features user registration, login, posting, and viewing threads.
- Live Demo: <https://evangadi-forum2025-psi.vercel.app/>
- GitHub: <https://github.com/Fuad-Delil/EvangadiForum2025>

Bright Sprouts Learning

- Front-end freelance project for a daycare business based in the USA.

- Customized an existing HTML/CSS/JS template to meet the client's brand and layout requirements.
- Integrated EmailJS for contact form submissions without server-side code.
- Deployed on Hostinger
- Live Demo: <https://brightsproutslearning.com/>
